Cousins

What are bees?

Bees are striped insects.

They have six legs.

Bees say
buzz, buzz, buzz!

They have wings to fly.

Maisy likes to watch the
bees in her garden.
How many can you see?

What do bees need?

A safe,
dry home
to live in

Lots of flowers

Water
to drink

Sunshine
(Bees do not like rain.)

Maisy fills a little pond with water for
the bees and other animals to drink.

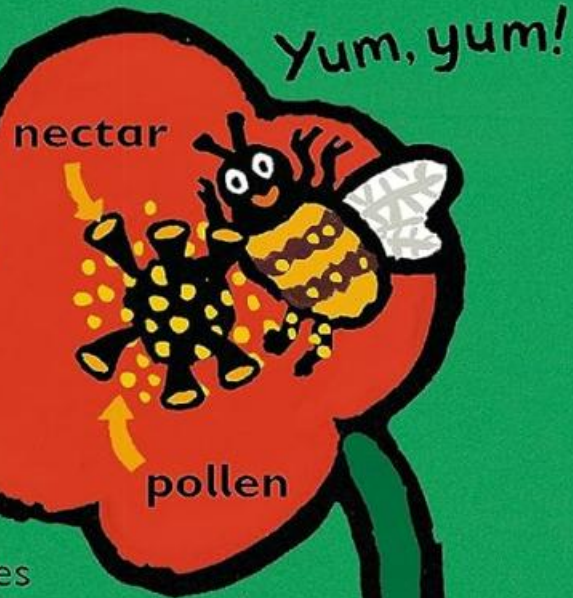

Bees love flowers

Bees eat pollen
and sweet
nectar from
inside flowers.

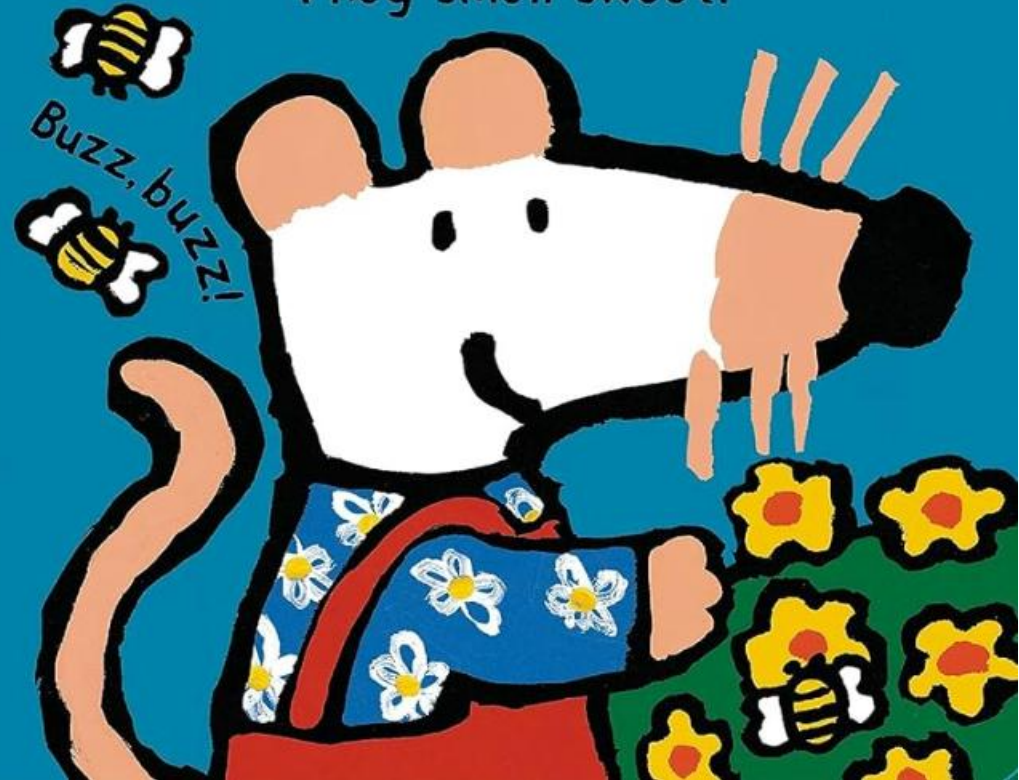

petals

They collect
dusty pollen on
their legs and bodies
and spread it from
flower to flower.

Yum, yum!

Maisy loves flowers too.
Yellow ones are her favorites.
They smell sweet.

Where do bees live?

Honeybees live with thousands of friends.
Their home is called a beehive.
It can be a wooden hive or a
nest they build themselves.

Buzz!

Buzz!

Maisy has found
a honeybee nest
in a tree!

Buzz, buzz, buzz!

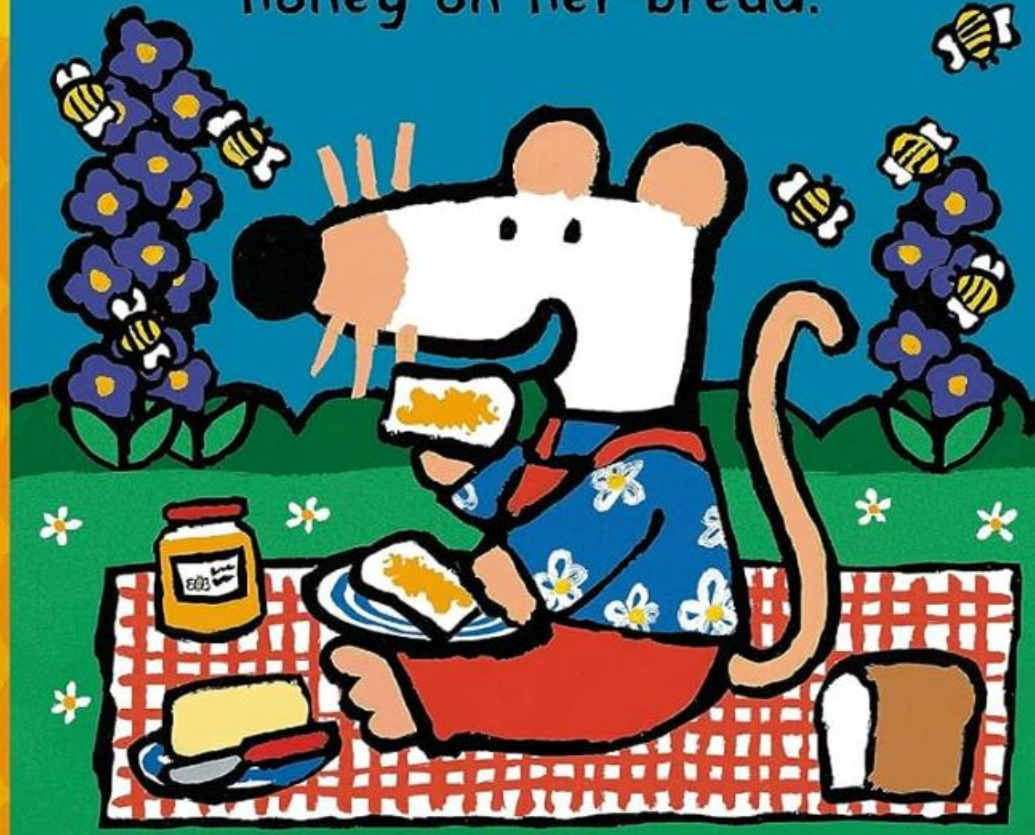

Inside a beehive

Inside a beehive are
honeycombs made of beeswax.

Worker bees fill them up with honey.

Maisy likes to eat
honey on her bread.

Bees are the best!

By spreading pollen,
bees help plants to grow.
Lots of plants means lots of food!

Maisy loves
bees!

Thank you, bees!
